
CHUCK E. CHEESE'S SHOW 4 2015

PLAY DATES
JUNE 15 – AUGUST 10

ENTERTAINMENT NEWSLETTER FOR SHOW 4 2015
PLEASE SHARE WITH ALL CHUCK E. CHEESE'S CAST MEMBERS.

It's hot outside! But as you know, it's super-cool inside Chuck E. Cheese's. We are happy to bring you Show 4 2015! It features some super-cool music videos from artists Meghan Trainor, Echosmith, Justice and even a throwback from OutKast! Not to mention, new songs from Josh & the Jamtones and, of course, it goes without saying, some old favorites from Chuck E. and his pals. We hope you enjoy the new show. As always, thanks for taking such great care of our guests!

Below is the show release schedule and play dates for the remainder of 2015:

Show 4 – Jun. 15 through Aug. 9 (Current Show)
Show 5 – Aug. 10 through Sep. 27
Show 6 – Sep. 28 through Nov. 1
Show 7 – Nov. 2 through Dec. 27

AUDIO STANDARDS

The enclosed show will have a volume level difference of 10 dBs between the Live/Birthday shows and the regular show. During non-peak times, the volume can be adjusted between 70dBs and 80dBs for the regular show. The General Manager and Technical Manager will use their discretion to determine the correct non-peak volume. The show volume should not drop below 70dBs or be higher than 80dBs during non-peak times. During peak hours, the volume will be set to the standard which is 80dBs during regular show and 90dBs during Live/Birthday show. Below are instructions to your Technical Managers on how to properly set and calibrate the amps for this new setting. Once the amps have been set, it is imperative that amps are not adjusted.

Step 1: Make sure you have the proper sound meter and it is set to *Weight C* and *Reaction Slow*. This must be done in the morning when there is no ambient noise.

Step 2: For Studio C, have the control panel set at 100%. For all other shows, have the volume adjustment set to its highest level.

Step 3: On the Live/Birthday shows, adjust your amp until your sound meter reads about 90 dBs.

Step 4: Confirm your regular show is about 80 dBs in the show room and game room.

Step 5: Once you have confirmed the settings, remove the amp knobs if possible. If you cannot remove the knobs, then find a way to make it difficult to randomly adjust the knobs. If none of the above can be done, then mark the proper volume level on your amp.

Step 6: Unplug the sense microphone(s) from the back of the Symetrix.

Step 7: On the next directional, go over the volume settings with the managers.

With the new settings, the loudest the show will go is about 90 dBs. If you have any questions, please get in contact with your DT or RT.

Chuck E. Cheese's Show 4 2015
